

Join us for our Training Course on
INTERNATIONAL BEST PRACTICES IN LOGISTICS MANAGEMENT

Hosted by the Shenzhen Logistics & Supply Chain Management Association (**LSCMA**)
in conjunction with the China Chapter of Logistics & Supply Chain Management Society (**LSCMS**)
in association with the Australian Logistics Academy (**ALA**)

Tuesday 19 January, 0900-1700

at LSCMA Training Centre in Futian District, Shenzhen

This one day program comprises extracts from Diploma program from The Australian Logistics Academy, together with content from LSCMS - the Singapore Government-approved Logistics and Supply Chain Management Society

The one-day Training Course will explore best practices in four key areas of logistics management:

- **Warehouse Management**
The Warehouse or Distribution Centre is as critical, if not more so, as any other department in an organisation. Its contents alone can account for as much as 90% of the total operating capital of the company.
- **Inventory Management**
Adequate inventory is critical in ensuring the continuity of operations within any industry. However, inventory investment can be a very expensive affair. The direct costs of carrying inventory depress profits and ties up much needed finance.
- **INCO TERMS**
How best to use INCO TERMS to support the transactions of the business while maintaining service levels and minimizing risk – includes overview of INCO TERMS in relation to shipment types and the responsibilities of buyers and sellers
- **Logistics Technology**
An introduction to the latest technologies, as well as the business concepts and terminology involved in supply chain management, including overview of Order Processing Cycles and the Bullwhip Effect

Who Should Attend? Logistics, freight and transportation industry professionals with at least two years of work experience and are interested to learn about international best practices, and in continuous professional development

Certificate: Delegates will receive a Course Completion Certificate issued by the Logistics & Supply Chain Management Society www.lscms.org

Free LSCMS Membership: All delegates will be granted Free Membership to LSCMS for year 2010

INTERNATIONAL BEST PRACTICES IN LOGISTICS MANAGEMENT

Trainer Profile

Professor Raymon Krishnan

President, Logistics & Supply Chain Management Society

Professor Krishnan has over 18 years experience in the Logistics & Transportation Industry—as both end-user and as service provider, including senior management positions in a variety of international companies based in Asia, USA, Europe and Australia. Raymon has a degree in Logistics from the Royal Melbourne Institute of Technology and has also pursued postgraduate and doctoral work with the University of Wollongong and Southern Cross University. He is an Honorary Fellow of the University of Wollongong and is conducting research in the area of Combined Distribution Networks. With extensive practical experience in logistics projects Singapore, Indonesia, Australia, Vietnam and Malaysia, Raymon is qualified as an Assessor and Supervising Assessor by the Singapore Workforce Development Agency.

The MPower logistics training programs offer exceptional value through:

- Curriculum based on **International Best Practices** – adopting international best practices into the local China market will empower superior performance and competitive advantage
- **Academic Recognition** – the curriculum from The Australian Logistics Academy (ALA) is accredited by leading Universities in England, Wales, New Zealand and Australia
- **Industry Endorsement** – programs are approved and endorsed by leading industry organizations, including Logistics & Supply Chain Management Society (Singapore), the China Logistics Club (Hong Kong), the Global Institute of Logistics (New York, USA) and the Logistics & Supply Chain Management Association of Shenzhen
- **Industry Practitioner Trainers** – all programs are delivered by experienced industry practitioners, with professional training qualifications and have been accredited by LSCMS
